

Saad Rahman Warsi

Software Developer (Backend / APIs / Cloud & DevOps)

Ottawa, ON | saadrahmanwarsi@gmail.com | 613-889-9830 | [linkedin.com/in/saad-rahman-warsi](https://www.linkedin.com/in/saad-rahman-warsi) | github.com/Saad-Rahman-Warsi | <https://saad-rahman-warsi.github.io/portfolio/>

Open to relocation and onsite work. Available to move immediately

Work Authorization: PGWP (valid) | Security Clearance: Reliability

PROFESSIONAL SUMMARY

Software Developer with hands-on experience delivering backend, cloud, and data-driven systems in Canadian government and SaaS environments. Currently working full-time at Agriculture and Agri-Food Canada (AAFC) following graduation. Strong experience building REST APIs, automating data pipelines, containerizing applications, and supporting scalable systems in Agile teams. Proficient in Java, Python, cloud platforms (GCP, Azure), and modern DevOps practices. Known for reliability, clean code, and the ability to contribute quickly to production systems.

TECHNICAL SKILLS

- Languages: Java, Python, C/C++
- Backend & APIs: Spring Boot, REST APIs, Microservices
- Databases: PostgreSQL, SQLite, Firebase, TileDB
- Cloud & DevOps: Docker, Kubernetes, GCP, Azure, AWS, OpenShift, Jenkins
- Testing & Quality: Selenium, Pytest, JMH, PitTest, SonarQube
- Tools: Git, Maven, Jira, Confluence

PROFESSIONAL EXPERIENCE

Software Developer (Contract, Full-Time) – Agriculture and Agri-Food Canada (AAFC)

Jan 2026 – Present | Ottawa, ON

- Developed and maintained backend services supporting research and analytics workflows
- Supported production systems with high reliability and performance requirements across multiple research teams
- Automated data processing pipelines using shell scripting and HPC tooling
- Engineered containerized deployments ensuring portability across environments
- Collaborated in Agile teams using Git, Jira, and CI/CD pipelines

Software Developer (Part-Time / Co-op) – Agriculture and Agri-Food Canada (AAFC)

May 2024 – Dec 2025 | Ottawa, ON

- Automated bioinformatics pipelines using shell scripts and Slurm, reducing effort by 70%
- Executed large-scale workloads on HPC clusters with 94% imputation accuracy
- Built genomic data storage solutions using SQLite and TileDB
- Containerized applications using Singularity

IT Programmer/Analyst (Co-op) – Canada Revenue Agency (CRA)

Sep 2023 – Dec 2023 | Ottawa, ON

- Developed internal web applications using Java, Spring Boot, Angular, PostgreSQL
- Built RESTful APIs and deployed microservices using Docker and OpenShift
- Acted as Scrum Master and contributed to Agile delivery

Software Developer Intern – CNW Group (Cision)

Jan 2023 – Apr 2023 | Ottawa, ON

- Worked on content ingestion pipelines for large-scale data processing systems
- Implemented automated alerting and supported migration of cloud-based data streaming services to Google Cloud Platform (GCP)
- Resolved critical build issues and improved system reliability

EDUCATION

- Bachelor of Applied Science – Software Engineering (CO-OP)
- University of Ottawa, Ottawa, ON
- Graduated: January 2026 | CGPA: 9.55 / 10

SELECTED PROJECTS

- PharmFinder (Capstone): React, Spring Boot, PostgreSQL, Kubernetes
- Cloud Microservices Deployment: Docker & Kubernetes on GCP
- Automation & Testing Framework: Selenium-based test suites

CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ-900), 2024
- Professional Scrum Master I (PSM-I), 2024
